

Katie Letchworth became Moffitt's ERAS Coordinator in December of 2019. Katie helped develop the ERAS program along with a multidisciplinary team of surgeons, anesthesiologists, nurses, social workers, case managers, physical therapists, nutritionists and pharmacists. Having joined the Moffitt team in January of 2005, Katie has much experience as an inpatient nurse, perioperative nurse and nurse educator. She is thrilled to be involved in the Enhanced Recovery After Surgery (ERAS) Program as this provides her the opportunity to share her combined experiences with Moffitt patients undergoing surgery.

I can help you on your surgical journey by:

- Providing ERAS-specific education
- Guiding you through your procedure specific guidelines
- Answering questions or concerns that arise along the way
