The next issue of *Cancer Control: Journal of the Moffitt Cancer Center* will focus on cancer of the esophagus. Among the topics and authors are:

- "Barrett’s Esophagus and Barrett’s-Associated Neoplasia: Etiology and Pathologic Features," by Domenico Coppola, MD, and Richard C. Karl, MD, of H. Lee Moffitt Cancer Center & Research Institute

- "Surgical Approaches to Esophageal Cancer," by Steven C. Teng, MD, and Richard Karl, MD, of H. Lee Moffitt Cancer Center & Research Institute

- "Role of Radiation Therapy in the Management of Esophageal Cancer," by N. V. Raman, MD, and William Small, Jr, MD, of Northwestern University Medical School

- "Palliation of Dysphagia of Esophageal Cancer by Endoscopic Lumen Restoration Techniques," by H. Worth Boyce, Jr, MD, FACP, MACG, of the University of South Florida College of Medicine

- "Endosonographic Staging of Esophageal Cancer," by H. Worth Boyce, Jr, MD, FACP, MACG, of the University of South Florida College of Medicine

- "Neoadjuvant Therapy for Esophageal and Gastroesophageal Junction Tumors," by Robert J. Green, MD, and Daniel G. Haller, MD, of the University of Pennsylvania

The regular departments of *Cancer Control* will feature Imaging in Oncology, Clinical Research Protocols, Pathology Update, Infections in Oncology, and Ten Best Readings on Cancer of the Esophagus. A special report on "Laparoscopic Adrenal Resection: Changing Techniques for Changing Indications" will also be included.
