Clinical Research Protocols For Oncology Support And Palliation

This list of clinical research protocols relating to oncology support and palliation is compiled for your convenience.

Pain Control

CAN-NCIC-PR6 Phase III Randomized Study of Mitoxantrone and Prednisone With or Without Clodronate in Patients With Hormone Refractory Metastatic Prostate Cancer and Pain.

DIATIDE-117-22 Phase II Randomized Study of Tin Sn 117m DTPA versus Placebo in Patients With Painful Osteolytic Bone Metastases.

DIATIDE-117-30, UCMC-97012201 Phase II Study of Sn-117m DTPA versus Strontium-89 in Patients With Painful Bone Metastases Secondary to Prostate Cancer.

E-1Z95 Phase II Study of Flecaainide for the Treatment of Chronic Neuropathic Pain.

Age range: no age specified.

E-3Z93, NCI-P95-006S Randomized Pilot Study to Evaluate Educational Intervention and Behavioral Skills Training for Pain Control in Patients With Recurrent or Metastatic Breast or Prostate Cancer.

E-4Z93, NCI-P93-005I Oral Analgesia Regimen for Improved Pain Control in Cancer Patients.

Symptom Management/ Quality of Life

CAN-NCIC-HN2 Phase III Study of Bacitracin, Clotrimazole, and Gentamicin (BCOG) Lozenges versus Placebo Lozenges in Patients Undergoing Radiotherapy for Oral, Pharyngeal, or Laryngeal Cancer.

RTOG-9801 Phase III Randomized Study of Amifostine Mucosal Protection in Patients With Favorable Performance Inoperable Stage II, IIIA, or IIIB Non-Small Cell Lung Cancer Receiving Sequential Induction and Concurrent Hyperfractionated Radiotherapy With Paclitaxel and Carboplatin.

RTOG-9714, NCI-P97-0124, NCCTG-R9714 Phase III Randomized Study of Palliative Radiation Therapy for Bone Metastases From Breast or Prostate Cancer.
Phase III Randomized, Double-blind Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study Comparing Granisetron versus Metoclopramide in Combination With Dexamethasone in the Prophylaxis of Chemotherapy-Induced Delayed Emesis.

Phase III Randomized Study Comparing Continued Hospital Care vs Early Discharge Therapy of Low-Risk Patients With Fever and Neutropenia.

Phase III Randomized Study of Warfarin vs Placebo for Chemoprevention of Thrombosis in Central Venous Access Catheters in Cancer Patients.

Phase III Randomized Study of the Effects of Epoetin Alfa on Hemoglobin, Symptoms Distress, and Quality of Life During Chemotherapy in Lymphoma Patients With Mild or Moderate Anemia.

Legend for Abbreviations:

CAN-NCIC = National Cancer Institute of Canada  
CCG/WFU = Comprehensive Cancer Center of Wake Forest University  
CLB = Cancer & Leukemia Group B  
CTI = Cell Therapeutics, Inc.  
DIATIDE = Diatide, Inc.  
E = Eastern Cooperative Oncology Group  
EORTC = European Organization for Research on Treatment of Cancer  
EU = European Voluntary Protocol  
GOCIG = Grupo Oncologico Cooperativo del Sur  
MSKCC = Memorial Sloan-Kettering Cancer Center  
NCCTG = North Central Cancer Treatment Group  
NCI = National Cancer Institute  
ORTHO = Ortho Biotech, Inc.  
RPCI = Roswell Park Cancer Institute  
RTOG = Radiation Therapy Oncology Group  
SCCC = Sylvester Comprehensive Cancer Center  
SWOG = Southwest Oncology Group  
SWS-SAKK = Swiss Group for Clinical Cancer Research  
UCMC = University of Cincinnati  
URCC = University of Rochester Cancer Center
